

# Egress Switch at a glance

Do you **need...**

A simple yet secure way to share sensitive information electronically?

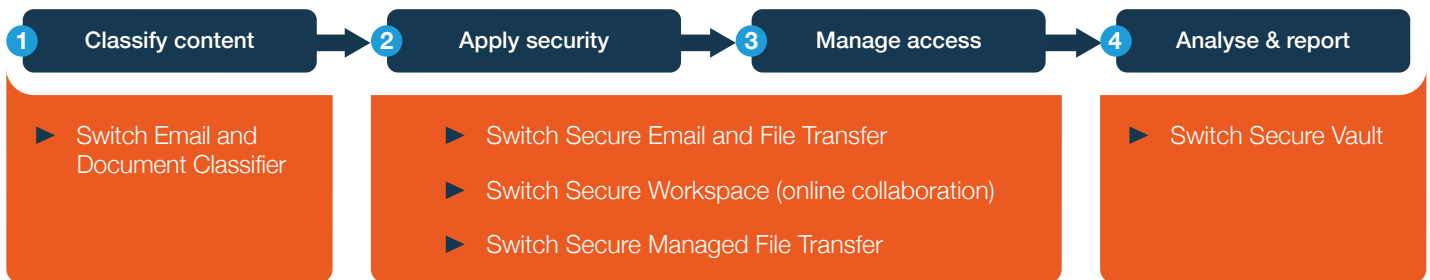

A way to prevent users from sending information to unauthorised recipients?

The ability to track and audit information leaving their organisation?

To remain compliant with industry regulations?

To enforce policies centrally rather than rely on end-users to share securely?

**Egress Software Technologies** is the leading provider of data security services designed to protect shared information throughout its lifecycle, delivered through a single platform: Egress Switch.

## Unique **selling points**

- **One solution** rather than multiple applications for data classification, archiving, secure email, file transfer and collaboration
- The only **UK Government CPA Foundation Grade** email encryption product on the market
- Patented key management enables **real-time control and visibility** of shared information
- The only solution that offers **search for archived, encrypted data**

## Strong **reputation** in:

- Blue Light
- Central Government
- Construction
- Energy & Utilities
- Financial Services
- Healthcare
- Legal & Professional Services
- Local Government
- Manufacturing

## Relevant to your **requirements:**

- ✓ Archiving
- ✓ Audit
- ✓ Compliance
- ✓ Data classification
- ✓ Digital initiatives
- ✓ DLP
- ✓ Email security
- ✓ Encryption
- ✓ Internal threat
- ✓ Online collaboration
